Note

There are four separate indices in this annual cumulative index to *Language and Language Behavior Abstracts* Volume VIII(1974): author index, subject index, book review index, and source publication index. All references to abstracts contained in *LLBA* are by the abstract number which precedes each abstract.

The *author index* is a name and not a person index. Rules of alphabetization are applied by computer. No attempt has been made to consolidate multiple entries for the same person if his or her name was not listed exactly the same way every time it appeared in the source publications referenced.

The *subject index* contains descriptive phrases intended to provide information about the contents of each article abstracted. This information may include the general subject matter or the dependent variable(s); the independent variable(s); tests; population; and additional information such as book review, case report, conference proceedings, review of the literature, etc.

The *book review index* lists the author(s) and original title for every book of which a review was abstracted.

The *source publication index* includes the full title, subtitle(s), and current subscription address of publication screened for articles which satisfy the *LLBA* selection criteria outlined in the Preface. References to articles abstracted from each publication, if any, are by year, volume, issue, sequence number, month/season, and pagination.
